

leafy vegetables

- **Reduces transplant shock**
- **Increases vigour of root and shoot growth**
- **Improves nutrient uptake**
- **Increases resistance to drought and waterlogged conditions**
- **Improved size and higher yields**

Kelpak, a natural biostimulator extracted from freshly harvested *Ecklonia maxima* kelp, scientifically proven to increase the health, quality and yield in a wide variety of crops. **The global leader in auxin based seaweed products for over thirty years**

KELPAK

Kelpak on lettuce globally

% Increase in leaf/head weight above control

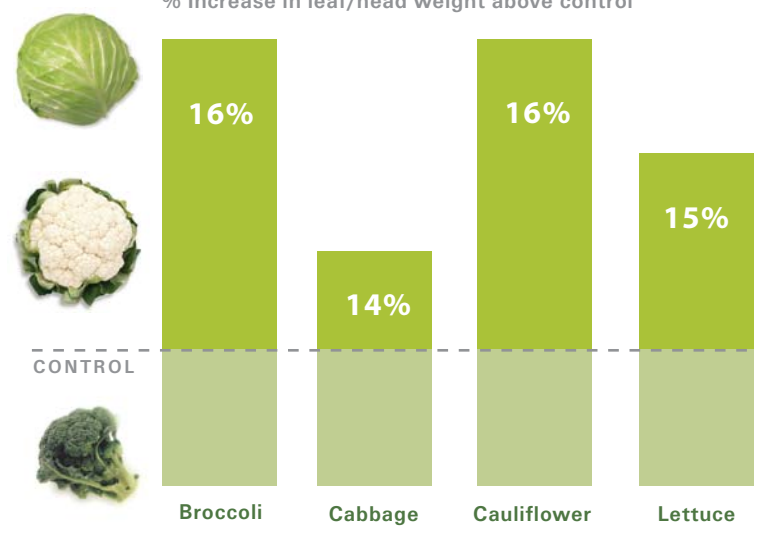

**DROP FOR DROP
THE MOST EFFECTIVE
BIOSTIMULANT**

Leafy vegetables

% Increase in leaf/head weight above control

RECOMMENDED APPLICATION RATE

Dip the seedling tray roots or roots of plants from seedbed in a 1:100 dilution before plant-out

and

Spray 2 - 3 L/ha 14 days after plant-out and repeat once or twice at 14 day intervals. Do not spray after button formation

Start with foliar application at 3 to 4-leaf stage for direct seeded crops

Kelpak can be applied in mixes with other pesticides and foliar nutrients, but pH of spray solution should be below 7 for optimum results
