

macadamia

- Improves rooting of nursery trees
- Stimulates root and shoot development after establishment
- Improves the development of new roots in spring
- Increases nut set and retention
- Increases nut yield

Kelpak

Kelpak is a natural biostimulant manufactured from the brown kelp *Ecklonia maxima*, found on the west coast of South Africa. Kelpak is produced using a cold cellular burst extraction method to preserve the delicate compounds in the cell sap. The end product significantly improves overall plant growth and increases macadamia yield.

A global leader in seaweed products for over forty years

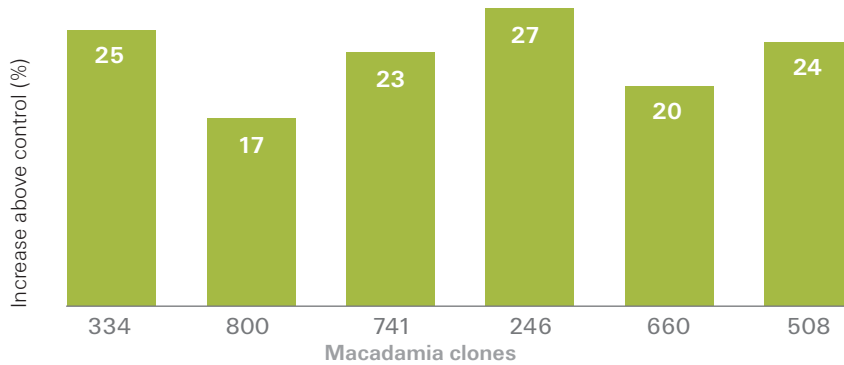

Kelpak

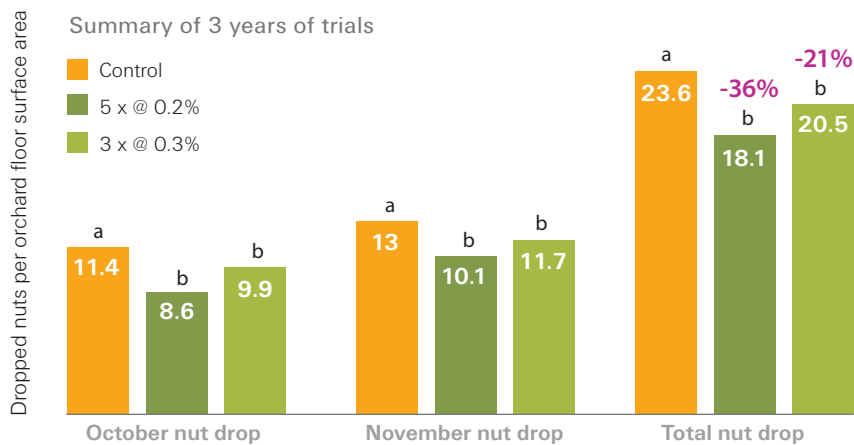

Kelpak on macadamia yield (kg nuts in hull) – Malawi

4 x monthly applications (June - September) at 0.2% Kelpak

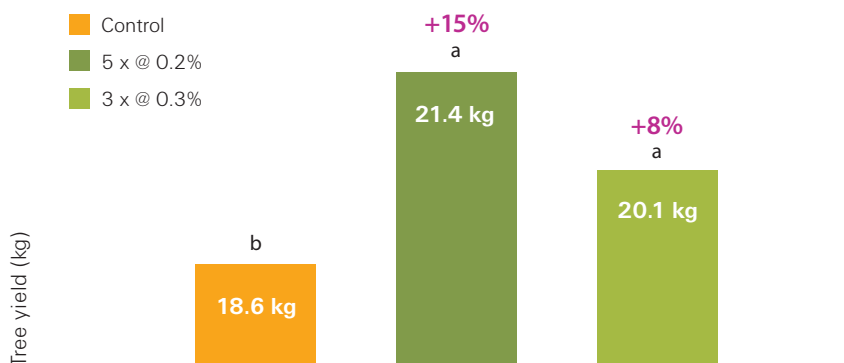

Kelpak on macadamia nut drop – White River, South Africa
